Fine Perfume Oil

Why perfume oil?

Perfume oil is made with essential and fragrance oils. It's alcohol-free, oil based, long lasting, and concentrated.

Being oil-based it smells stronger and lasts longer than traditional alcohol based perfumes that tend to evaporate quicker. Just Heavenly perfume oil is highly concentrated; just a few drops will go a long way.

It comes in a convenient roll-on applicator bottle, and we have 5 perfume options: Orange Patchouli, Amber & Earth, Lemongrass Vanilla, Love Spell, and Lavender Honey.

Hydra - Hyaluronic Acid Serum

Hyaluronic acid Serum helps to retain moisture in the skin. It can also improve the appearance of wrinkles and fine lines, while helping to improve skin tone, texture, and treating dry skin conditions.

How does it work? HA is a group of sugar molecules called polysaccharides that work to cushion and lubricate. They are found naturally in our body's connective tissues. Over time, however, our body's stores of HA decline.

Here's where HYDRA comes in: topical products—like HYDRA which contain HA—can help rebuild those depleted stores. Dermatologists have found that hyaluronic acid can absorb more than 1,000 times its weight in water!
